

APPOINTMENTS ARE
NOW AVAILABLE!

LEARN ABOUT OUR **SERVICES**

My Health Onsite is excited to announce our **First Phase of Behavioral Health Counseling Appointments** through a partnership with a local counseling practice and independent clinician. These appointments will be supported through a different platform and separated from the medical record system used for My Health Onsite medical appointments. **The platform, called, Telehealth by Simple Practice**, also includes an app and built-in virtual appointment support, which will be the first appointment type available.

We are helping patients reach their highest potential by providing support during their journey. We have an array of Behavioral Health Services such as **Diagnostic/Assessment, Individual Therapy and Family Therapy**. Our licensed mental health professionals offer support that includes:

- Anxiety Disorders, Anger Management, Social Anxiety, and Panic Attacks
- Major Depressive Disorder, Disruptive Mood Dysregulation Disorder, Attention Deficit Hyperactivity Disorder (ADHD/ADD)
- Oppositional Defiant Disorder, Bipolar Disorder, Trauma, Obsessive Compulsive Disorder, and Behavioral Issues at School
- Life Transitions, School Issues, Grief/Loss and More...

All services are available to qualified members on their employer's health insurance plan. No referral needed.
